V6 Partner

- **CIDEON V6 xPDM - SAP Interface**

Asynchronous and bidirectional interface between 3DEXPERIENCE and SAP

- **Automates business processes between engineering and manufacturing disciplines**
 - Provides necessary information for planning, design, production and maintenance
 - Supports PLM functionalities such as Engineering Central Parts and BOM Management
 - Eliminates redundant data input
 - Insures integrated change and release processes
- **Built on Dassault Systèmes xPDM framework**
 - Highly scalable and reliable architecture
 - Highly flexible mapping of 3DEXPERIENCE data to SAP and vice versa
 - Comprehensive administration tools for easy administration and controlled synchronization
