« WE INTEGRATE YOUR PLM WORLD »

- **PROSTEP V6 xPDM Adapter**  
for Windchill, Teamcenter, SAP & SimManager

*Bi-directional, process-driven synchronization of data*

(BOMs and Product Structures, including files)

- Allows the integration of V6 and 3rd-party systems with proven standard software
- Uses standard interfaces and separates business logic making the solution more independent from system upgrades for overall effort reduction
- Covers typical use cases "out-of-the-box" so projects can be planned more safely
- Reduces ramp-up times by delivering pre-configured product software
- Benefits from PROSTEP's integration and migration experiences as well as from partnerships with Dassault Systèmes, PTC, SIEMENS, SAP and MSC Software

Prerequisites\*

PCS | PDA
