

XSENS

“Inertial Motion Capture Technology”

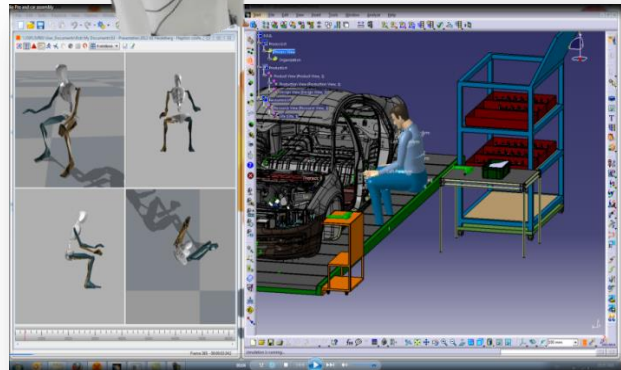

- **Products: 3D Motion Capture**

- **Xsens MVN (BIOMECH)**

- Flexible, camera-less, full-body motion capture system
 - Can be used indoors and outdoors regardless of terrain or lighting conditions
 - Requires minimal post-processing as there is no occlusion or lost markers
 - Sensor fusion algorithms ensures highly accurate output
 - Integrated with CATIA /DELMIA/3DVIA V5 via Haption RTID Human

- **Benefits**

- Quickly, easily and realistically create manikin movements for product and process design
 - Evaluate how workers and users interact with their product lines and products early in the design process
