“Forging the Path to Effortless Interaction”

- **Product: Myo Gesture Control Armband**

Your muscles talk, the Myo armband listens

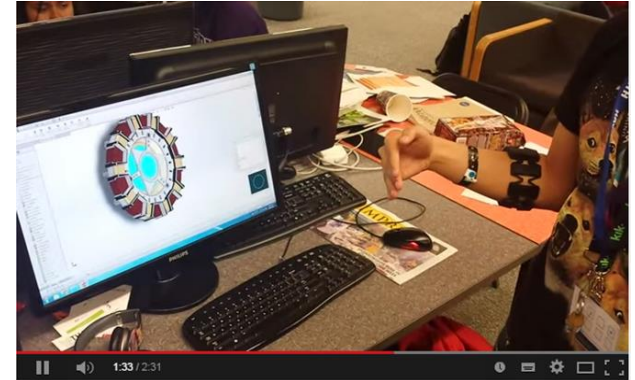

Groundbreaking technology, movements and gestures are tracked in two ways:

- Gestures or poses using proprietary electromyography sensors
- Motion sensing using 9-axis inertial measurement unit

- **Benefits**

Compelling end-user experience across the 3DEXPERENCES portfolio

- Touch-free , seamless interaction between humans and devices
- With the wave of your hand, it transforms the way you interact with your digital world
