

# ATHEER LABS

“Reimagine the way you work”

- **Product: AiR™ Platform**

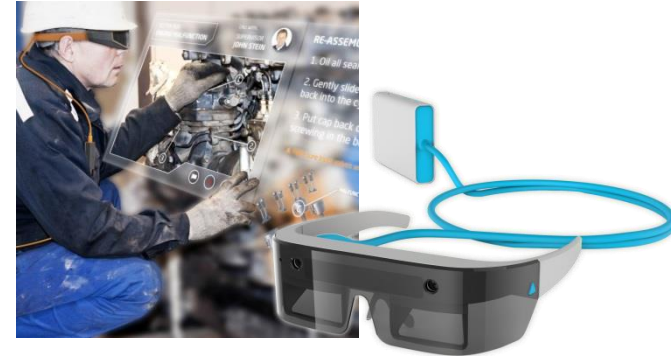

*Combining the power of 3D augmented reality with natural interaction*

- Visualize 3D models and instructions in the field of view
- Interact with 2D and 3D content with natural hand gestures
- Share workspace and content with peers for faster collaboration and decision making

- **Benefits: Example Use-Cases**

- Aerospace assembly worker to access DELMIA manufacturing instructions and CATIA models hands-free inside plane under construction
- Automotive worker trained for assembly line by simulating workflow steps and instructions in the actual environment
- Oil and Gas worker on an oil rig to share live video with back office expert for timely maintenance and repair
