

MPC DESIGNWORKS

MPC Designworks is specializing in product development, mechanical design and engineering of composites, from concept to production.

“3DEXPERIENCE® on the cloud allows us to design and manage all our data on a single platform, leveraging our knowledge to deliver quality products.”

– Miguel Passanha, CEO, MPC Designworks

Challenge

Facing an increasing number of projects and short development cycle time, MPC Designworks needed a solution to centralize its engineering data, allowing knowledge reuse and reducing time to market, while maintaining quality products.

Solution

MPC Designworks adopted the 3DEXPERIENCE platform on the cloud to design and manage its new projects and to leverage its CATIA V5 project data.

Benefits

The lifecycle data management and collaborative capabilities of the 3DEXPERIENCE platform allow better control and reuse of engineering data, and speeds up product design with fast component reuse and validation.
