

GSEA DESIGN

GSea Design is an engineering company with expertise in structural analysis and high-performance composites for the marine industry.

“3DEXPERIENCE on the cloud perfectly meets our needs in terms of collaboration both internally and externally with our customers.”

Challenge

Driven by R&D and innovation, GSea Design needed to deliver high-quality requirements quickly to remain ahead of the competition in racing yachts construction, and simplify the decision process for its customers.

Solution

GSea Design adopted the 3DEXPERIENCE® platform on the cloud to innovatively industrialize the design of high-performance materials. The platform provides increased flexibility and efficiency due to digital continuity on the cloud.

Benefits

The 3DEXPERIENCE platform on the cloud improved the way engineers worked, helping to save time on design projects and accelerate the time-to-market of compliant products. It also enabled more flexibility and better collaboration within the team.
