

# SANTONI

Santoni Shanghai, a leading manufacturer of seamless knitting machines and large diameter and hosiery machines that it sells worldwide.

“The **3DEXPERIENCE** platform helps us better manage our company’s knowledge leading to improved R&D efficiency and customer service.”

— Dr. Changle Li, CKO, Santoni

## Challenge

As Santoni’s business grew, the company’s workforce did as well, so it was key to leverage knowledge and know-how across the company. This is why the company sought a collaborative solution for its entire workforce to increase global team efficiency and collaboration with task and issue management.

## Solution

The company adopted the **3DEXPERIENCE**® platform and ENOVIA to benefit from strong capabilities to coordinate processes, data, tasks, knowledge, ideas, schedules, requirements, changes and efficient communications across multiple groups and departments.

## Benefits

Having all data in one place with access to up-to-date product and project information at any time helped Santoni make better and more informed decisions across the entire lifecycle from R&D to after sales. This helped establish a more agile product development process and faster time-to-market, helping the company further expand its business and enhance its customer service.
