

## A-PLAS

Based in Turkey, A-Plas manufactures plastic parts for the automotive industry using sophisticated technology and lean production.

“With the **3DEXPERIENCE** platform, we can access our data anywhere in a collaborative environment with high security standards.”

— Orkun ATAKAN, Design Chief, A-Plas

### Challenge

A-Plas needed to improve its product design quality and implement an efficient collaborative solution to improve productivity, reduce the product development cycle and ensure data security while avoiding any loss of data.

### Solution

The company decided to move to the **3DEXPERIENCE**® platform and its design application CATIA to overcome product-development process complexity and solve collaboration issues by leveraging cutting-edge technology.

### Benefits

By adopting the **3DEXPERIENCE** platform, A-Plas can now work in a secured environment with access to its data anytime, anywhere to develop its products. Thanks to the platform's user-friendly interface and collaboration capabilities, cooperation across teams has significantly improved.
