

# KONČAR GENERATORS AND MOTORS

Končar develops, designs and manufactures generators and motors for electric energy plants and equipment, including dedicated services.

“It was our first project with the 3DEXPERIENCE platform. We have achieved more than we expected, and this is just the beginning.”

— Ante Elez, CEO, Končar Generators and Motors

## Challenge

Končar Generators and Motors wanted to reduce product design time and eliminate potential errors by sharing accurate data for production. Its aim was to make the whole process transparent, manageable and traceable.

## Solution

The company adopted the 3DEXPERIENCE® platform for the concurrent engineering and parametric design capabilities associated with its product lifecycle management functionalities.

## Benefits

With the 3DEXPERIENCE platform, Končar significantly shortened its product design time. As a result, the company was able to deliver faster at a competitive cost.
