

ÖZLER PLASTİK

Based in Turkey, Özler Plastik manufactures plastic caps, packaging, parts for automotive OEMs and other technical parts for various sectors.

"The 3DEXPERIENCE platform enables us to work collaboratively and eliminate process complexity while increasing productivity."

— Murat Özadam, CEO, Özler Plastik

Challenge

Özler Plastik needed a collaborative solution to streamline and accelerate its product design projects. Designers were using complex menus and inefficient processes in an outdated work environment, leading to loss of time, data and productivity along with security issues.

Solution

The company selected the 3DEXPERIENCE® platform and its design application CATIA to eliminate complexity in the product development process and resolve collaboration issues.

Benefits

Using the 3DEXPERIENCE platform, Özler Plastik has significantly improved collaboration among its teams. Data management is now easier with access to up-to-date information whenever and wherever needed. Mastering the process complexity has accelerated the company's productivity.
