

TEH-CUT

The company manufactures special equipment for aluminum die casting, polymer injection molding and composite forming tools.

“The **3DEXPERIENCE** platform helps us work faster and avoid expensive mistakes during production.”

— Dusko Radovic, CEO and Owner, TEH-CUT

Challenge

TEH-CUT needed to connect and automate its internal processes to improve efficiency and avoid manufacturing errors.

Solution

The company adopted the **3DEXPERIENCE**® platform to set up workflows, optimize internal processes, connect with third-party software, and implement data and issue management.

Benefits

The **3DEXPERIENCE** platform helped TEH-CUT to improve its internal communication among departments, synchronize with third-party software and unify its product lifecycle management. Dedicated scripts enable the company to generate automated Bill of Materials. Now, with the **3DEXPERIENCE** platform, the company can track the manufacturing changes to avoid future mistakes.
